

JO COFFEE® – 100% COMPOSTABLE PODS FOR KEURIG® BREWERS COMING SOON

Our Jo Coffee® certified 100% compostable coffee pods for Keurig K-Cup® brewers uses renewable plant-based materials. They are designed to completely break down in commercial composting facilities. After each freshly brewed cup of Jo, the ring, lid, filter, and brewed coffee grounds will turn into nutrients for the soil when composted.

LID
Made with PAPER and other compostable materials

RING
Made with coffee bean skins and other compostable materials

FILTER
Made with plant-based materials

PürPod100™ is the world's first Certified 100% Compostable single serve pod materials for Keurig K-Cup® brewers.

- PürPod100™ materials are approved by the USA Compost Manufacturing Alliance (CMA).
- Certified by the Biodegradable Products Institute (BPI).
- All components are designed to break down into compost.
- Real world field-tested and contamination-tested in municipal and industrial composting facilities.
- Proven to break down in as little as 5 weeks in aerobic processes.
- Successfully tested in anaerobic digestion environments.
